## Honduras Mission Trip

July 8-22, 2012

Dr. Richard Charlick, president of HTI, led a group of 18 team members from all over the U.S. The group included 7 medical, 5 optical, 4 dental, 1 evangelist, and 1 helper. Honduras is listed as having the poorest health care in the Western Hemisphere. Dr. Charlick reported that over 3100 patients were treated in the medical, dental, optical, and prayer clinics. Medical and dental patients were given free medications and optical patients received free glasses. Most patients had never seen a dentist, and as a result, there were hundreds of aching and infected teeth extracted.

Over 20 pastors were left in the area to follow up with the new Christians. Approximately 2,500 thirty-page booklets were handed out that simply explained how to become a Christian. There were also 250 New Testaments given to new Christians. Dr. Charlick said, "The most important fact was we saw several hundred unreached people ask to become Christians and they invited Jesus into their heart and life. Praise the Lord!"

## Uganda Mission Trip

July 3-22, 2012

Dr. Bill Johanson, an HTI board member, led a group of 18, including a dentist, nurses, medical interns and assistants. They treated in the villages for 10 consecutive days and 3 different clinic sites, gave out hundreds of reading glasses and pulled 400+ teeth. Most treatment sites had people waiting for hours, with a final tally of over 3,500 patients being assisted. From the mainland to the islands, many people were blessed and encouraged.
